

## 121 Research Drive, Saskatoon, SK

This multi-tenant office building is the sixth facility in Innovation Place's Advanced Building Program. For the design of this sixth facility, Innovation Place applied many "lessons learned" from past buildings: radiant heating and cooling, low thermally transmitting curtainwall, and heat recovery technology are all prevalent.

Budget: \$35,000,000

### CONSULTING SERVICES

Responsible for designing the control system, simulating the facility and preparing the Commercial Building Incentive Program application, and providing support for the LEED application.

### PROJECT HIGHLIGHTS

- 100% outside air with heat recovery, radiant cooling, indirect lighting
- 50% less energy than MNECB
- High performance building, no additional capital cost
- Fully commissioned facility
