

Senior Project Management (Commissioning)

Location: Saskatoon, SK

Integrated Designs is a fast-growing sustainability consulting and project management firm that is looking for a Senior Commissioning Coordinator to help us with our growing workload in **Building Commissioning and Energy Management**.

We are a unique firm that nurtures the life goals and passions of our employees so that they will grow with us. If you are interested in joining a really cool company, we'd love to meet you.

Desired Experience and Professional Qualities:

- Professional Engineer (PEng) designation required
- Ability to deliver fully commissioned commercial building projects
- Preferred, 6+ years of project management experience with familiarity of commercial construction and building controls systems
- Preferred CEM or 4+ years experience with delivery of Energy Management projects and Energy Audits
- Ability to assist in all aspects of a project, including planning, resource allocation, meeting support and budgeting
- Exceptional communication skills, including analytical, technical writing, team building, collaboration and problem solving
- Knowledge of the new generation of high performance building systems
- Knowledge of the LEED certification process
- Knowledge of Energy Management and Retro-Commissioning
