

# Canada Post Winnipeg Mail Processing Plant, Winnipeg, MB

The Canada Post Winnipeg Mail Processing Plant is a two-storey building with 23,000 sq. m. of mail processing plant space and approximately 4,000 sq. m. (over two-storeys) of retail, office, cafeteria, kitchen, and training space. This plant will be a model for new plants across the country, and is located in Winnipeg, Manitoba.

IDI is an important member of the large design-build team. Early on in the schematic design, IDI advised on issues affecting LEED goals. As the design and construction progressed, IDI prepared the LEED Certification application, modeled the building for its energy use, and delivered Fundamental and Best Practice Commissioning.

- One of few industrial facilities targeting LEED Certification
- Landmark facility for Canada Post
- Excellent use of native landscaping
- High water reduction goals
- Incorporates many energy saving features such as high-efficiency condensing boilers, heat recovery ventilators, efficient T5 plant lighting, and highly insulating roof construction
