

Partnering for a sustainable advantage

Mechanical Designer, Sustainable Projects
Location: Saskatoon, SK

Integrated Designs Inc. is a fast-growing successful sustainability consulting and project management firm that is looking for an enthusiastic and talented Mechanical Designer for our Saskatoon or Calgary office. This person will take a lead role in establishing IDI as a Mechanical Design firm that is a leader in delivering practical, cost effective, high performance sustainable building projects.

If you interested in joining a high involvement company and are capable of meeting these job expectations we would like to talk with you about this exciting opportunity at Integrated Designs.

Desired Experience:

- 3+ years experience in commercial and institutional building mechanical HVAC design.
- Knowledge of the Integrated Design, high performance building systems and the LEED certification process
- Knowledge of Energy Management, LEED and Retro-Commissioning would be considered an asset
- Bachelor's degree in Mechanical Engineering; P.Eng. Candidates with CET designation will be considered
- Ability to work independently, possessing excellent organizational skills with a strong attention to detail
- Business skills including leadership, marketing, sales and people management
- Exceptional communication skills, including analytical, technical writing, team building, collaboration and problem solving
